## Business Telecoms Solutions

Through our Telecoms Partnership, we are able to offer our customers, a comprehensive range of telecoms systems and services. We can cater for almost any requirement from the most simple small office system to a fully data conversant multi-site solution. This allows our customers to benefit from the latest technology, using the most-up-to-date and innovative solutions:

**CTI (Computer Telephony Integration) - Voicemail - Auto-attendant - Call logging and Call management - CAT5 Installations - ISDN - Voice Over Internet Protocol (VoIP)**

### Least Cost Routing

Cheaper Call Charges - Over 60% of businesses in the UK use someone other than BT to bill their phone calls. We can help you to successfully reduce these call charges.

### Why Not Challenge Us To Reduce Your Telecoms Expenditure!?!

To arrange a free Telecoms Analysis  
Call 01892 603450

### Cut The Cost of Line Rental

In addition to making cheaper calls, you can also benefit from switching your line rental supplier. Businesses of all sizes can benefit from a complete, convenient line rental package that can provide generous savings.

### Business Broadband

Broadband has moved on in recent years and there is now an extensive choice of services to choose from. The great news is that we can offer free migrate of your existing broadband service.

In addition to the ADSL we also offer SDSL services to companies with more stringent upload requirements.

SDSL is an ideal solution for demanding business use, allowing a host of additional services and functionality to be gained. Services such as Virtual Private Networking, FTP and Voice over IP communications can run concurrently with general web surfing and sending and receiving emails. Being easy to install, SDSL can be connected into a wide variety of computing and networking environments.

### Our price promise:

“ We will never be beaten on price ”

- One bill
- No set-up fees
