

Top Ten Reasons To Buy Windows® Small Business Server 2011 Standard

Ideal for small businesses with up to 75 users, Windows Small Business Server 2011 Standard (SBS 2011 Standard) is an affordable, all-in-one server solution with enterprise-class technologies that help you protect your business data, increase employee productivity, and support your business growth.

- 1** **Get a Comprehensive, All-in-One Solution:** Take the guesswork out of selecting software for your network. Windows Small Business Server 2011 Standard delivers enterprise-class technologies for data backup and restore, e-mail, remote access, collaboration, file and printer sharing, internal Web sites, and support for mobile devices—in one fully integrated solution.
- 2** **Simplify Back-up for Business Data:** Help protect your vital business information from loss by automatically backing up the data on your network, and recover accidentally deleted files in the event of disaster. With easy-to-use interfaces, you or your IT consultant can gain better control of your data, PCs, and network.
- 3** **Access Business Information from Virtually Anywhere, Anytime:** Be productive whether you're out of the office, at home, or on the road. SBS 2011 Standard gives you secure access to business contacts, calendars, e-mail, files, your desktop, and even shared resources from any Internet-connected PC, from virtually anywhere at any time.
- 4** **Centralize Data Storage:** Save time organizing, finding, and sharing business information. With SBS 2011 Standard, you can create a central location to store, organize, share, and quickly find critical business data.
- 5** **Keep Your Network Healthy and Up-to-Date:** Help ensure the health of your network and keep your PCs and servers current with easy-to-read "green check" reports that give you a quick view of PC and server status, antivirus status, Microsoft software updates, and backup progress.
- 6** **Take Advantage of Powerful Technologies Designed and Priced for Small Business:** Share resources and equipment, such as Internet access, printers, and fax machines and get the most value from your technology investment. SBS 2011 Standard delivers multiple technologies that include Microsoft Exchange and Windows SharePoint optimized specifically for small businesses at an affordable price.
- 7** **Support your Business Growth:** Easily add users, servers, and applications as your business needs change. SBS 2011 Standard can support your critical line-of-business applications and is designed to work seamlessly with your existing Microsoft technology.
- 8** **Run Line-of-Business Applications:** Windows SBS Standard with Premium add-on offers a powerful, integrated platform for line-of-business applications by including Windows Server 2008 R2 Standard and Microsoft SQL Server 2008 Standard for small businesses.
- 9** **Stay Connected to the Business:** Securely access all of your communications—e-mail, voice mail, instant messaging, and more—from virtually any platform, Web-browser, or device to get more done wherever you are with the integrated Exchange Server 2010 and Microsoft Outlook® Web Access (OWA) capabilities.
- 10** **Simplify IT Management:** Manage common IT tasks and address technology issues before they occur with a comprehensive view of the health and security of your computers and servers in the network from one administrative console.
